

MARTIN MUGNIER

Ph.D. Candidate in Economics at CREST, ENSAE Paris, Institut Polytechnique de Paris

✉ martin.mugnier@ensae.fr – 🌐 martinmugnier.github.io

Office Contact Information: 5 avenue Henry Le Chatelier, 91120 Palaiseau, France

Personal Information: 07/19/1995, French

Ph.D. Supervisor: Xavier D’Haultfoeuille

Xavier.D’Haultfoeuille@ensae.fr

Primary Fields of Research: Theoretical Econometrics, Analysis of Longitudinal (Panel) Data

Secondary Fields of Research: Mathematical Statistics, High-Dimensional Statistics

EDUCATION

POSTGRADUATE STUDIES

| | |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sep. 2019 – | CREST, ENSAE Paris, Institut Polytechnique de Paris , France Ph.D. Candidate in Economics • Dissertation title: “Nonlinear Panel Data Models and High-Dimensional Statistics” |
| 2018 – 2019 | Université Paris-Saclay , France M.Sc. in Applied Mathematics (<i>with honors</i>) • Major in Mathematical Statistics and Machine Learning Theory |
| 2017 – 2019 | ENSAE Paris , France Ingénieur Économiste-Statisticien, Graduate Program • Major in Data Science and Statistical Learning |
| 2016 – 2017 | École Polytechnique, HEC Paris, ENSAE Paris, ENS Paris-Saclay , France Master in Economics (1 st year) (<i>with highest honors</i>) |
| 2015 – 2019 | École Normale Supérieure Paris-Saclay , France M.Sc. in Economics and Management • Civil servant student (“ <i>normalien</i> ”) |

GRADUATE STUDIES

| | |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2015 – 2016 | Université Paris 1 Panthéon-Sorbonne and ENS Paris-Saclay , France B.Sc. in Economics (<i>with honors</i>) |
| 2013 – 2015 | Toulouse School of Economics & Lycée Ozenne , France Licences 1 & 2 in Economics and Management (<i>ranked 7th out of 722 & 1st out of 274</i>) • Preparatory classes for the national competitive examination for admission to the ENS Paris-Saclay (option D2): two-year undergraduate intensive course in mathematics, economics, and management. |

WORKING PAPERS

Fixed Effects Binary Choice Models with Three or More Periods (*with Xavier D’Haultfoeuille and Laurent Davezie*) R&R at *Quantitative Economics*

We consider fixed effects binary choice models with a fixed number of periods T and without a large support condition on the regressors. If the time-varying unobserved terms are i.i.d. with known distribution F , Chamberlain (2010) shows that the common slope parameter is point identified if and only if F is logistic. However, he only considers in his proof $T = 2$. We show that actually, the result does not generalize to $T \geq 3$: the common slope parameter can be identified when F belongs to a family including the logit distribution. Identification is based on a conditional moment restriction. Under restrictions on the covariates, these moment conditions lead to point identification of relative effects. Finally, if $T = 3$ and mild conditions hold, GMM estimators based on these conditional moment restrictions reach the semiparametric efficiency bound.

Make the Difference! Computationally Trivial Estimators for Grouped Fixed Effects Models

Novel estimators are proposed for linear grouped fixed effects models. Rather than predicting a single grouping of units, they deliver a collection of groupings with the same flavor as the so-called Lasso regularization path. Mild conditions are found that ensure their asymptotic guarantees are the same as the so-called grouped fixed effects and post-spectral estimators (Bonhomme and Manresa, 2015; Chetverikov and Manresa, 2021). In contrast, the new estimators are computationally straightforward and do not require prior knowledge of the number of groups. Monte Carlo simulations suggest good finite sample performance. Applying the approach to real data provides new insights on the potential grouped structure of the unobserved heterogeneity.

WORK IN PROGRESS

| | |
|------|----------------------------------------------------------------------------------------------------------------------------------------|
| 2020 | Unobserved Clusters of Time-Varying Heterogeneity in Nonlinear Panel Data Models |
| 2020 | Identification and (Fast) Estimation of Nonlinear Panel Models with Additively Separable Two-way Fixed Effects (<i>with Ao Wang</i>) |
| 2020 | Asymptotic Properties of Empirical Quantile-Based Estimators (<i>with Xavier D'Haultfœuille and Jérémy L'Hour</i>) |
| 2019 | Linking Patents to Firms: Insights with French Firms (<i>with Matthieu Lequien, Loriane Py and Paul Trichelair</i>) |

GRANTS & AWARDS

| | |
|-------------|-------------------------------------------------------------------------------------|
| 2021 – 2022 | EUR Data Science for Economics, Finance and Management International Mobility Grant |
| 2019 – 2022 | French Ministry of Higher Education, Research and Innovation, Full Scholarship |
| 2015 – 2019 | École Normale Supérieure Paris-Saclay, Full Scholarship |
| 2017 | Hackaton Ernst & Young-Genius ENSAE, 2nd Prize – Deep Learning Challenge |

TEACHING EXPERIENCE

Undergraduate Courses (Principal Instructor)

| | |
|----------|-------------------------------------------------------------|
| Fall '19 | Linear Algebra and Python (24 hrs), HEC Paris & ENSAE Paris |
|----------|-------------------------------------------------------------|

Undergraduate TA sessions at ENSAE Paris

| | |
|---------------|---------------------------------------------------------------------------------|
| Fall '20, '21 | Mathematical Foundations of Probability Theory (21 hrs), prof. Cristina Butucea |
| Spring '21 | Differentiable Optimization (21 hrs), prof. Guillaume Lecué |

Graduate TA sessions at ENSAE Paris

| | |
|-----------------|-------------------------------------------------------------|
| Spring '20, '21 | Econometrics II (18 hrs), prof. Mickael Visser |
| Fall '20, '21 | Mathematical Statistics I (18 hrs), prof. Arnak Dalalyan |
| Spring '20, '21 | Mathematical Statistics II (11 hrs), prof. Matthieu Lerasle |

PROFESSIONAL EXPERIENCE

| | |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| April – Sep. 2019 | CREST, Microeconometrics Lab , Palaiseau, France (4 months) Research assistant to Pr. Xavier D'Haultfœuille. • Theoretical econometrics • Conducted research on statistical identification in discrete choice models with high-dimensional fixed effects. |
| June – Sep. 2018 | Banque de France, DGSEI, SEPS , Paris, France (4 months) Research intern, supervised by Matthieu Lequien and Loriane Py. • Designed a machine learning based algorithm to fuzzy-match patent data from the PAT-STAT Global database to SIRENE, the national register of French firms held by Insee. |
| 2017 – 2018 | Société Générale, Inspection Générale , Paris, France (8 months) ENSAE Team Project in Applied Statistics (part-time internship), supervised by Clément Sentis and Walid Amrane. • Designed predictive algorithms to forecast and anticipate credit risk and defaults in a portfolio of medium-sized firms for a subsidiary in Africa. |
| April – July | Toulouse School of Economics, IAST , Toulouse, France (4 months) |

| | |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2017 | Research assistant to Senior Scholar Daniel-Li Chen (IAST/NBER). <ul style="list-style-type: none"> Collected, cleaned and explored very large datasets. Designed and implemented econometric specifications to capture psychocognitive bias in decision-making in U.S. Courts such as cognitive caseload, time-effects, sequential-contrast effects, date of birth effects Research assistance on the project “The Impact of Financial Payments from Pharmaceutical Industries on Prescribing Behaviors and Patient Outcomes”. |
| May – July 2016 | French Treasury, French Embassy in Colombia, Regional Economic Service , Bogotá, Colombia (2 months) Economist intern, supervised by Laurent Charpin. <ul style="list-style-type: none"> Performed a statistical analysis aiming to highlight promising sectors for French exports Produced a report from personal research and many interviews conducted in Spanish. |
| 2016 – 2017 | C’efficace , Paris, France (2 years) Individual teacher. <ul style="list-style-type: none"> Taught courses in Economics, Marketing and Mathematics to high-school and undergraduate students. |

PROGRAMMING SKILLS & LANGUAGES

| | |
|--------------|-------------------------------------------------------------------------------------------------|
| Prog. skills | Python**, R**, Stata**, SAS**, L ^A T _E X**, Microsoft Office**, HTML/CSS* |
| Languages | English (fluent, TOEIC : 915/990), Spanish (intermediate), French (native) |

CONFERENCES & SEMINARS

| | |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Seminars | University of Chicago (Econometrics Student Group, 05/2022; I.O. lunch, 04/2022; Econometrics Workshop, 04/2022), CREST Ph.D. Seminar (06/2022, 10/2021, 12/2020, 07/2020), CREST Microeconometrics Seminar (03/2022, 09/2021), Hadamard Doctoral School Ph.D. Seminar (02/2021), EPFL Workshop on Computational Methods in Social Science (07/2019) |
| Conferences | European Winter Meeting of the Econometric Society (12/2021), Bristol Econometric Study Group (09/2021), EEA Congress (08/2021), China Meeting of the Econometric Society (07/2021), Asian Meeting of the Econometric Society (06/2021), African Meeting of the Econometrics Society (06/2021), IAAE Annual Conference (06/2021, 2020 cancelled), 50èmes Journées de la Statistique (2020 cancelled) |
| Co-organizer of | CREST Ph.D. Seminar (2019-2021), CREST Statistics-Econometrics-Machine-Learning Seminar (2019-), CREST Econometric Reading Group (2020) |

OTHER DUTIES

| | |
|-------------|--------------------------------------------------------------------------------------------------------------------|
| 2020 – 2021 | Ph.D.s’ representative on the Board of Directors of Groupe des Écoles Nationales d’Économie et Statistique (Genes) |
|-------------|--------------------------------------------------------------------------------------------------------------------|
